FESTIVAL / 2026

OUT
N LOUD

WEBSITE STRATEGY AND TECHNICAL BLUEPRINT

An expressive festival website, secure ticketing experience, and operational platform for Jos, Plateau State.

26 DEC 2026

JOS, PLATEAU STATE

CREATIVE DIRECTION / ARCHITECTURE / ROADMAP

THE BRIEF

More than a festival.

Build a destination for music, community, culture and event discovery that lasts beyond a single December.

> **"Where the City Gathers, the Culture Speaks, and the Energy Comes Alive."**
>
> OUT N LOUD — FESTIVAL MANIFESTO

01

Create anticipation

Strong story-led homepage, countdown, lineup and imagery.

02

Drive ticket conversion

Fast mobile checkout, clear ticket tiers and secure payment.

03

Build long-term community

Subscriber engagement, memories and reusable annual editions.

STEP 1

Art direction & identity

Expressive African street culture with the discipline of a premium editorial website.

FESTIVAL ORANGE

JOS GREEN

MIDNIGHT BLACK

OFF WHITE
#F8F6F0

ELECTRIC YELLOW
#FFD600

SIGNAL RED
#ED2828

TYPOGRAPHY

BOLD. LOCAL. LOUD.

Headlines: Archivo Black or Anton. Interface and body: DM Sans. Handwritten accents: Caveat. Maintain strong contrast and generous negative space.

Motion design rules
Animated typography, restrained parallax, kinetic transitions and accent particles. Avoid excessive 3D, generic gradients, flashy glow, and motion that competes with ticket checkout. Respect reduced-motion preferences.

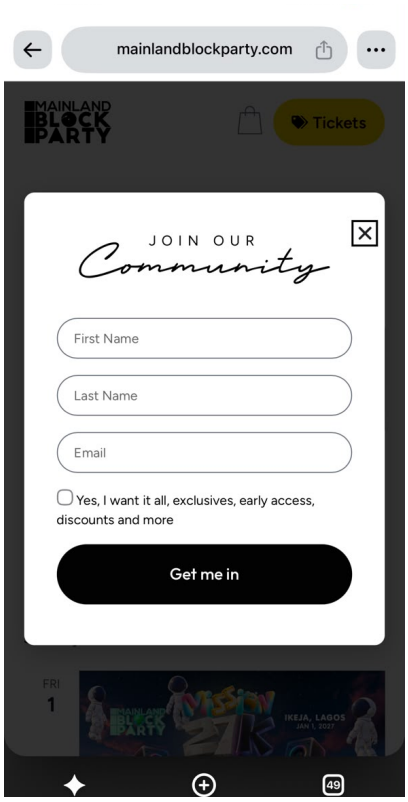

CREATIVE REFERENCES

Reference-informed. Not copied.

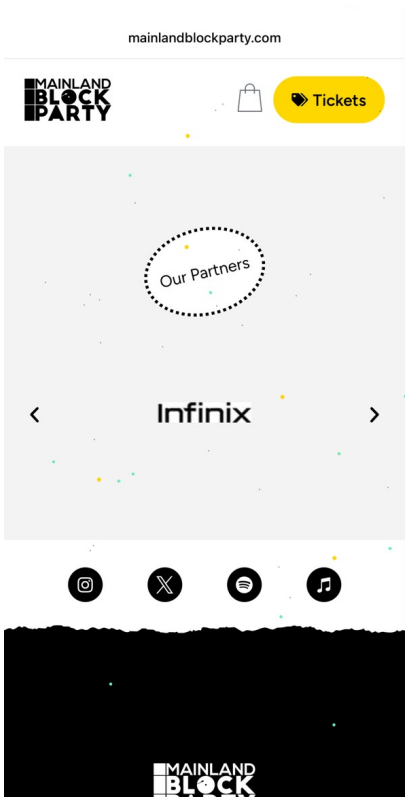

Use the supplied Mainland Block Party screenshots for interaction patterns and contrast, then build a distinct Jos-led design.

TYPOGRAPHIC HERO

COMMUNITY MODAL

PARTNER CAROUSEL

OUT N LOUD DIFFERENTIATORS

Use the festival orange as the signature dominant color, green road-sign motifs for Jos identity, original artist photography, dramatic headline transitions and custom admission tickets. Keep checkout and informational pages cleaner than the landing experience.

STEP 2

Pages & experience

Eight public content sections, with secure purchase and ticket retrieval screens.

01	**HOME**	Hero, countdown, highlights, lineup preview, tickets CTA
02	**ABOUT**	Story, manifesto, culture and Jos connection
03	**LINEUP**	Artists, DJ profiles, schedule, stages
04	**TICKETS**	Categories, perks, availability, checkout
05	**GALLERY**	Highlights, pictures, videos and memories
06	**PARTNERS**	Sponsor logos, packages and inquiries
07	**COMMUNITY**	Opt-in signup, exclusive updates, campaigns
08	**CONTACT & FAQ**	Venue, directions, policies, organizer contact

AUDIENCE JOURNEY

Discover. Buy. Enter.

Make checkout as simple as possible, especially on mobile devices.

01 **DISCOVER**
Homepage / social traffic

↓

02 **EXPLORE**
Lineup and festival story

↓

03 **SELECT**
Tier and quantity

↓

04 **PAY**
Secure Paystack checkout

↓

05 **RECEIVE**
Verified QR e-ticket

↓

06 **ENTER**
Gate staff validates ticket

Conversion principle: support guest checkout; collect only essential details, then deliver the ticket by email with a secure retrieval option.

STEP 3

Stack & data model

One Next.js application with a secure server-side integration layer.

LAYER	RECOMMENDED IMPLEMENTATION
FRONTEND	Next.js App Router + TypeScript
STYLING & MOTION	SCSS Modules + Motion / selective GSAP
BACKEND & DB	Supabase PostgreSQL + Auth + Storage + RLS
PAYMENTS	Paystack + verified webhooks
EMAIL & TICKETS	Resend + server-issued QR tokens
DEPLOYMENT	Vercel + monitoring / backups

CORE DATABASE TABLES

TABLE GROUP	RESPONSIBILITY
Events / performances	Annual editions, schedule and artists
Ticket types / orders	Tier inventory, customer purchase records
Payments / tickets	Verification, unique issue and ownership
Ticket check-ins	QR scans, timestamps and audit history
Subscribers / sponsors / assets	Community, partners and media
Admin users / messages	Permissions and enquiries

SECURITY: WEBHOOK VERIFICATION · RLS · IDEMPOTENCY · ATOMIC INVENTORY

STEP 4

Festival control center

Content, revenue, permissions and admissions management from one protected dashboard.

OVERVIEW

Revenue, ticket sales, attendee and check-in summaries

TICKETS

Create tiers, quotas, pricing, sales windows, resend

QR CHECK-IN

Mobile scanning, validation, duplicate entry prevention

CONTENT

Artists, schedules, sponsor logos, galleries and FAQ

COMMUNITY

Subscriber consent, exports and campaign management

ACCESS CONTROL

Super Admin, Event Manager, Finance, Gate Staff

Critical safeguard

Issue tickets only after payment verification. Use transaction-safe inventory updates and server-side scan validation; do not rely on frontend success messages.

STEP 5

Development & launch

Deliver the revenue-critical experience first, then progressively enhance the festival ecosystem.

01	**DESIGN & PLANNING** Brand system, Figma, requirements, ticket rules	3–5 days
02	**FRONTEND BUILD** Responsive pages, motion, SEO and accessibility	5–8 days
03	**PAYMENT & BACKEND** Database, Paystack, email and QR issuance	6–10 days
04	**ADMIN & OPERATIONS** Dashboard, roles, content and gate tools	4–6 days
05	**QA & DEPLOYMENT** Payment checks, load tests, monitoring, launch	3–5 days

ESTIMATED DELIVERY

21–34 WORKING DAYS

Assumes one experienced full-stack developer, timely client approvals, and supplied assets. Confirm whether tickets are sold on-site or via an external provider before finalizing scope.
